

Determine if the following situations are proportional. If so, write the equation of proportionality.

- 1) Julie wants to plant flowers in her garden. She plants 3 pink tulips for every 4 white tulips.
  
- 2) Leonard wants a new longboard. He already has \$150 saved and earns \$15 a week by doing chores around the house.
  
- 3) Bella is a gymnast. She can do 18 back handsprings every minute.
  
- 4) Miguel plays basketball. He makes 5 baskets for every 12 that he attempts.

Find the surface area.

5)

$$SA = 2B + Ph$$

$$B = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$

$$h = \underline{\hspace{2cm}}$$

6)

$$SA = 2B + Ph$$

$$B = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$

$$h = \underline{\hspace{2cm}}$$

Find the area and circumference for the following figures.

7)

Area=\_\_\_\_\_

Circumference=\_\_\_\_\_

8)

Area=\_\_\_\_\_

Circumference=\_\_\_\_\_

9)

Area=\_\_\_\_\_

Circumference=\_\_\_\_\_

10)

Area=\_\_\_\_\_

Circumference=\_\_\_\_\_
